|  <p>MXSweep GET YOUR MAILBOX Email Protection Service</p> | <p>It's inevitable that from time to time every business will suffer disruption to its email service – inevitable, that is, if it's not adequately protected from threats like viruses, spam, phishing, denial-of-service attacks and more. That's where email protection from MXSweep comes in, available to our partners as a valuable new service that you can provide to your customers.</p> <p>It's a hosted solution that gives your users the benefits of 99.92% spam and 100% virus protection.</p> <p>See full datasheet for details</p> |
| <p>What most of these don't realise, though, is that failure is inevitable. You can add all the bells and whistles you can find to prevent disaster – but no one can guarantee protection against loss of power, hardware failure, human error or any of the other problems lying in wait. So the answer lies in what should be done when the worst happens – how to ensure that people can continue to send and receive emails in the event of server failure.</p> <p>See full datasheet for details</p> |  <p>MXSweep GET YOUR MAILBOX Recovery and Continuity</p> |
